

WHY

BE A BOSS DISTRIBUTOR

Every business is looking for ways to increase their sales, maximise their profits and minimise their expenses. One of the best ways to do that is introduce a new range of products that can complement the existing business with good profitable margins and customers love them. The profit margins are great and well worth adding to your business, BOSS products are unique, serve a useful purpose and are needed by customers. BOSS products are fantastic quality and come with great back up and warranty.

You can leverage a Global Brand as an authorised BOSS Distributor

BOSS will direct sales to you that are made through our Global office. Being part of BOSS is about being part of a Global Brand that is already recognised in many countries around the world and you can leverage that global association.

When your selling BOSS products you are selling a proven product that is highly respected in the market and once customers in your region become familiar with BOSS the products will sell themselves. Doing business with BOSS is easy. We specialise in supplying pre packages kits or simple components as required. Its entirely up to the distributor.

DISCOVER OUR VISION

Every company has a reason for its existence and BOSS is no different, internally we call it our PURPOSE.

Boss Global's purpose is to make high quality, safe, affordable after market Air suspension available in all countries around the world. We believe that life is sacred and we want to do our bit to make sure vehicles that carry loads perform in the same safe way they did at the point of manufacture.

When it comes to carrying loads and stabilising vehicles we have the ability to make it happen. We already do in many countries around the world but it's not enough, we want everyone to have access to that safety and convenience at prices they can afford.

BUSINESS STRATEGY

Boss Global has been designing and manufacturing High Quality Air systems and Shock Absorbers for many years. Our core business is a supplier of a range of onboard air systems and air suspension products designed for a large range of Motor Vehicles, trailers, machinery.

The components that form part of our BOSS systems are amongst the best in the world.
